# An NC-TOPPS Story: Wake LME Results

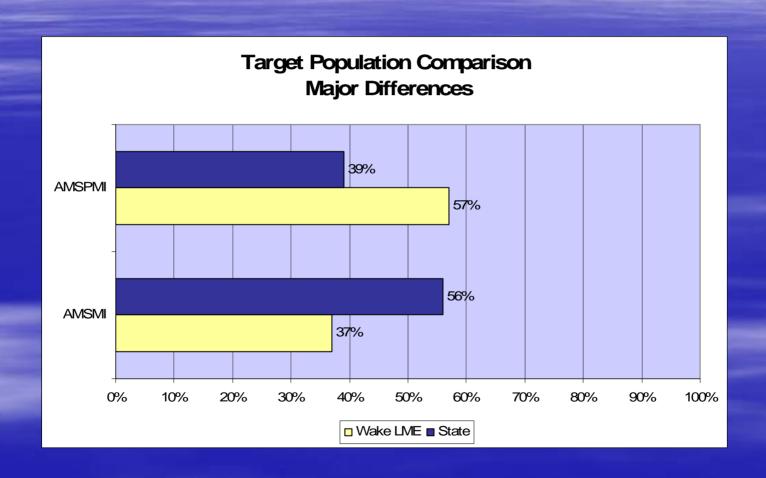

By: Dave Peterson, Quality Services
Coordinator
Wake County LME, Quality
Management Team

Every LME has it own unique character and outcomes. NC-TOPPS' statistics can highlight the needs particular to a community. The LME reports can tell a story and here is one for our LME...

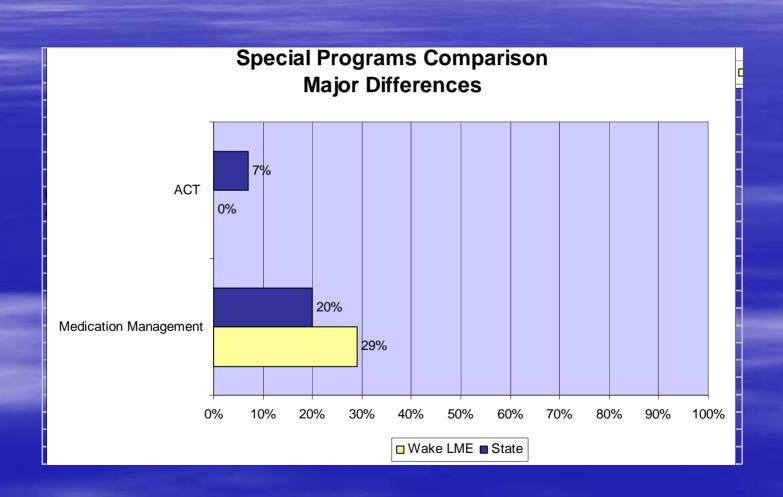

# Gender/Ethnicity

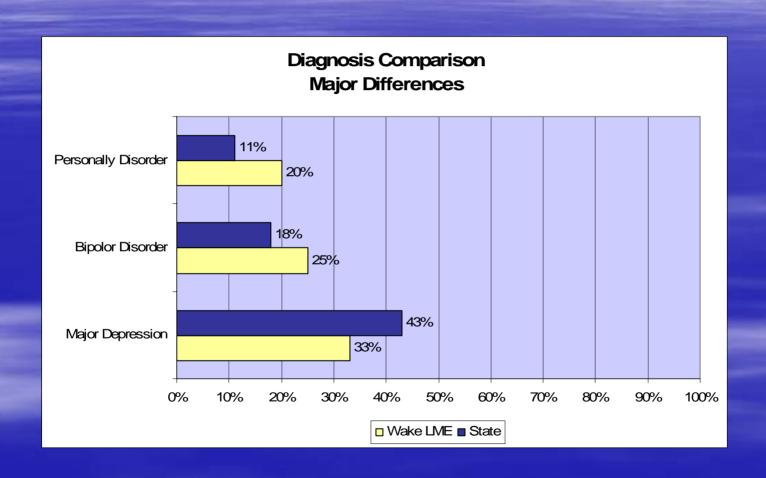

# Target Population

# Special Programs

## Diagnosis

#### Collection Method

It is always better to get the information face-to-face.

 Wake was 18% higher face-to-face interviews than the state average.

#### Labor Force

 Wake has 10% more clients that are in the labor force than the state average.

#### Children

 40% of Wake consumers have children under the age of 18 versus 29% for the State Average

### Risky Behavior

- Twice as many consumers report having Risky Sexual Activity in Wake versus the state average. (8% in Wake vs. 4% State)
- At the 3 month update Wake data drops to 3%, while the state stays at 4%

## Emergency Room Visits

 Wake emergency room visits did not decrease after three months of treatment versus the state dropping from 19% to14%.

## Helpfulness of Program Services

- Quality of Life was 14% higher than the state.
- Increasing Hope for Future was 10% higher than the state.
- Improving Education was 10% higher than the state.
